Who We Are

Malcolm Thompson Pumps, established in 1967, is one of Australia's largest locally owned and operated pump companies. We have all your pump needs completely covered, from single pump units, spare parts, custom pump packages, to pump repairs and service.

We pride ourselves on being a pump company that provides clients with complete pump solutions. Our focus is to deliver a quality range of industry leading pump brands, support our clients with a nationwide network of service and repair centres and offer complete pump package solutions, through our specialist design and fabrication service.

Our 40 years of experience dealing with pumps in industries such as mining, industrial, construction, agriculture, manufacturing, fire services, water, sewerage and wastewater industries has provided us with the expertise, skills and knowledge to solve any pumping problem.

Pump System Packages

At Malcolm Thompson Pumps we specialise in the provision of complete pump package systems built to customer specifications. Our dedicated projects and engineering department is able to design, fabricate, build, supply, install and commission a large range of engineered packages which include pumps, pressure vessels, valves, controls and function performance testing.

Our team of highly skilled engineers is dedicated to working closely with a range of clients to ensure that all custom built applications consistently meet individual project requirements. We understand the importance of on time tender and document submission, cost effective solutions along with the ability to work with one company for a complete project.

With projects ranging from dewatering pump stations, transfer pump stations and booster pump stations to distribution pump packages and plant water supply, we have the experience and knowledge across a huge range of pump system packages, ensuring we are consistently able to provide customers with resourceful, innovative solutions.

Service & Repair

IN-HOUSE SERVICE & REPAIRS

Fully equipped workshops located nationwide are available to test, repair and rebuild a wide range of pump types.

FIELD SERVICE & REPAIRS

Our fleet of service vehicles and team of experienced service technicians provide quality, on time repairs and maintenance at your premises.

PREVENTATIVE MAINTENANCE PROGRAMS

We specialise in service contracts and can provide customers with a scheduled preventative maintenance program to ensure all pumps continue to run at optimum performance.

PUMP & PUMP SYSTEM INSTALLATIONS

Installation & Commissioning of new pumps and complete pump systems, including Fire, Building Service and Bore Pump Packages, which are our area of expertise.

Extensive Pump Range

Our extensive pump range includes many leading international brands and a large selection of pump types. At Malcolm Thompson Pumps we have a pump suitable for all pumping applications and we also stock a large range of spare parts and pump accessories.

Piston and Plunger Pumps

Pressure Sewer Systems

Plastic Chemical Transfer Pumps

Magnetic Drive Pumps

End Suction Centrifugal Pumps

Specialised Centrifugal Pumps

High Pressure Jetting Equipment

Membrane Pumps

Multistage Pumps

Screw Pumps

Malcolm Thompson Pumps - Continually Expanding

As part of our ongoing strategy of identifying opportunities that will enable us to expand the breadth and depth of products and services we are able offer to our customers, Malcolm Thompson Pumps has acquired several companies in recent years. These companies have all been incorporated into Malcolm Thompson Pumps and have greatly enhanced the range of products and services we are able to offer our customers. We are proud to be continuing the industry leading reputations of these well known companies.

The acquisition of Nossiter Pump Services in 2007, saw Malcolm Thompson Pumps' operations in Sydney, NSW expand considerably. Since 1975 Nossiter had been a leading Sydney based pump company specialising in the supply, commission and servicing of pumping equipment and controls for fire protection and hydraulic services in high and low rise buildings. Malcolm Thompson Pumps is proud to continue to deliver the range of products and services and high level of personalised service that Nossiter was renowned for.

The acquisition of EPG Pumps in 2009 saw the formation of a diversified pump group with a comprehensive range of leading pump brands. EPG Pumps has had a long history in Australia, starting as Pacific Pumps in 1949 and being purchased by Engineered Products Group in 1996. Specialising in pumps for the mining, water and manufacturing industries, EPG Pumps distributed a range of specialist pump brands including Tsurumi, Weir Specialty Pumps, EOne, CAT, Toyo and Edur. The addition of the EPG Pumps product range resulted in a significant expansion of Malcolm Thompson Pumps' product range, ensuring we are able to meet a larger range of customer requirements.
